

# Beach Comfort & Convenience Hacks

Simple insider tricks that make Florida beach days more comfortable — without hauling extra gear or overpacking.

## Stay Cool Without Hauling Gear

- Arrive early — shade is natural and temperatures are lower
- Use a light towel over your shoulders instead of heavy shade tents
- Take short ocean dips every 30–45 minutes
- Sit closer to the waterline for natural breeze

## Phone Protection Tricks

- Use a zip bag or waterproof pouch — even on dry days
- Keep phone inside a shaded bag to prevent overheating
- Avoid placing phone directly on sand (heat + grains)
- Turn on low-power mode to reduce heat buildup

## Wind Control Tips

- Anchor towels with small sand piles at each corner
- Place bags on the wind-facing side as blockers
- Sit slightly behind dunes where permitted
- Face setup parallel to the shoreline, not directly into wind

# Sand Management Hacks

- Let sand dry before brushing off — it falls away faster
- Use a small towel to wipe feet before entering bags
- Keep one “clean zone” for food and phones
- A light dusting of water helps release stubborn sand

## Quick Cleanup Methods

- Pack items back in the reverse order you used them
- Shake towels near the waterline before leaving
- Wipe hands and feet before getting in the car
- Change clothes immediately after the beach if possible
